

## Letter of Intent for Collaboration

The research group lead by Prof. Dr. -Ing. Katja Laurischkat at Institute for Production Systems, Ruhr-University Bochum, Germany, and the IPSE research group in Department of Management and Engineering in Linköping University, Sweden would like to continue their research collaboration further in the area of Industrial Product Service Systems and IPSE (Integrated Product Service Engineering).

Those two research groups are interested in the collaborative activities in the above-mentioned area. The types of activities are described below.

1. Joint research and publication activities
2. Exchange of master and Ph. D. students
3. Exchange of teaching staff
4. Other activities

The above types of activities will be carried out when both of the two groups agree upon concrete and specific activities with written document. This letter will be invalid after five years from the date of the signature.
